FRIDAY, AUGUST 16, 2013
@ UChicago

Gordon Center for Integrative Science (GCIS)
Room W301
929 East 57th Street, Chicago, Illinois 60637

The CBC offers a **1:1 High Throughput Screening (HTS) Matching Grant Program** to help fund discovery of innovative small-molecule probes and drugs. The intent of this program is to support pilot projects involving biomedically-relevant targets that will be conducted at a HTS facility located at one of the CBC universities: Northwestern, UIC and The University of Chicago. CBC university affiliates of any rank (e.g. faculty sponsored graduate students, fellows, research faculty, or tenure-track faculty) are eligible to apply.

Come and learn about the CBC HTS Award program, the three HTS Facilities, and exciting ongoing screens. The CBC Staff and HTS Facility Directors will be on-site for Q&As.
