Xanax (alprazolam) is a prescription medication used to treat anxiety and panic disorders. It should only be obtained through a licensed healthcare provider who can assess your symptoms and provide a legitimate prescription. Using unverified online sources or “wellness” services can be extremely dangerous, as counterfeit pills may contain harmful substances or incorrect dosages. Patients are encouraged to consult accredited pharmacies, follow prescribed dosing, and explore therapy, lifestyle changes, or alternative medications. Responsible use under medical supervision ensures safety, effectiveness, and compliance with legal standards.
